# Purpose of Report

In line with the Rutland Joint Health and Wellbeing Strategy (2022-2025), this report has been produced to support and monitor the performance of indicators that are linked to each priority area within the strategy. A dashboard of indicators has also been developed to aid discussion and monitor progress.

The Rutland Joint Health and Wellbeing Strategy has six priority areas for action, with three cross cutting themes. The diagram below summarises the priorities and principles:

The outcomes summary report and dashboards will be updated on a quarterly basis to support the delivery of the Rutland Joint Health and Wellbeing Strategy. It is important to note that the dashboard will continue to be developed as the strategy evolves and the delivery plan is developed.

The dashboard sets out, in relation to each indicator, the statistical significance compared to the overall England position or relevant service benchmark where appropriate. A RAG rating of 'green' shows those that are performing better than the England value or benchmark and 'red' indicates worse than the England value or benchmark.

Appendix 1 provides more details on the similar areas to Rutland.

# Priority 1: Enabling the best start in life

## Performance Summary

- Out of all the comparable indicators presented for the enabling the best start in life priority, nine are green, 11 are amber and one is red. Five indicators have no comparison, and two indicators are lower than national.

- Rutland performed significantly worse than England/benchmark for the following indicator:

  **Proportion of children receiving a 12-month review** - Rutland is ranked 16th out of 16 in 2021/22. The proportion of children receiving a 12-month review has decreased from 37.0% in 2020/21 to 29.7% in 2021/22.

- Of all the indicators, Rutland ranks 1st (best/lowest performing) when compared to its similar neighbours for the following indicators:
  **Average attainment 8 score**
  **Children in care**
  **Hospital admissions caused by unintentional and deliberate injuries in children (0-14 years).**
  **Estimated number of children and young people with mental disorders-aged 5 to 17**
  **General fertility rate**

- There is currently one indicator where, when compared to similar areas, Rutland performs in the bottom three (worse performing):

  o   Proportion of children receiving a 12-month review

# Reducing Health Inequalities

## Performance Summary

- Out of all the comparable indicators presented for reducing health inequalities, one is green, one is amber and two are not comparable.

- Of the indicators, Rutland ranks 1st (best performing) when compared to its similar neighbours for the following indicators:
  **Healthy life expectancy at birth (Males)**
  **Life expectancy at birth (Males).**
# Rutland Joint Health and Wellbeing Strategy - Cross Cutting Theme: Reducing health inequalities

Ranking, Best and Worst columns are compared to the nearest neighbours only. Rank: 1 is calculated as the best (or lowest when no polarity is applied).

| Indicator | | | | Value | Rank | Best/Lowest | Worst/Highest | England | DoT | RAG |
|---|---|---|---|---|---|---|---|---|---|---|
| A01a - Healthy life expectancy at birth | F | All ages | 2018 - 20 | 66.8 | 8/16 | 70.1 | 62.6 | 63.9 | ▬ | 🟡 |
| | M | All ages | 2018 - 20 | 74.7 | 1/16 | 74.7 | 61.8 | 63.1 | ▬ | 🟢 |
| A01b - Life expectancy at birth | F | All ages | 2018 - 20 | 85.0 | 3/16 | 85.2 | 83.2 | 83.1 | ▬ | ⚪ |
| | M | All ages | 2018 - 20 | 83.2 | 1/16 | 83.2 | 79.2 | 79.4 | ▬ | ⚪ |

Note: For A01b Life expectancy at birth for females the worst value should be 83.4, for A01b Life expectancy at birth for males the worst value should be 79.6

- **COVID-19 Deaths\*\***

  As of week 22, in 2023, there have been a total of 117 Covid-19 deaths in Rutland. Of the total deaths involving Covid-19 in Rutland, 63 (53.8%) were in a hospital setting and 43 (36.8%) were in a care home setting.

  Since the beginning of the pandemic (week 12, 2020) there have been a total of 1,446 deaths (all causes) in Rutland.

  Based on the average mortality data for 2017-22 (excl 2020), we would expect 1,317 deaths in Rutland for this period. This reveals an excess of 129 deaths from any cause in Rutland during this period.
