What have we learnt in the PHOF update?

1. The proportion of 16-17 year olds not in education, employment, or training (NEET) or whose activity is not known has remained the same and continues to perform significantly better than England.

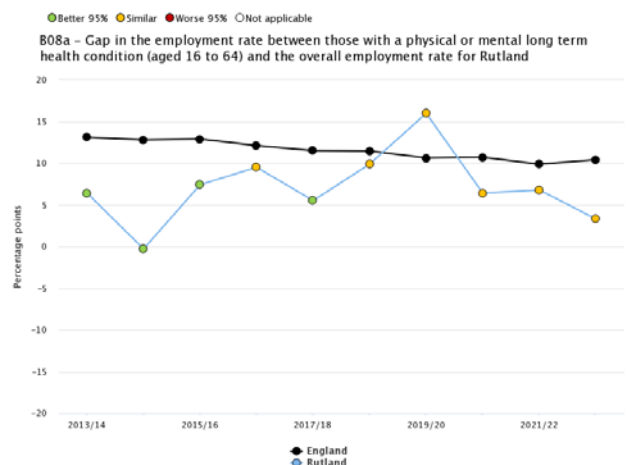

- The percentage of 16-17 year olds NEET or whose activity is not known in Rutland has stayed at 1.4% from 2021/22 to 2022/23. Rutland continues to perform significantly better than the national figure of 5.2% and has performed significantly better since 2017/18.
- Over the last five data points, the trend of the percentage of 16-17 year olds NEET or whose activity is not known in Rutland has witnessed no significant change.

2. The gap in employment rate for those with long term physical or mental health conditions has decreased over the past year in Rutland.

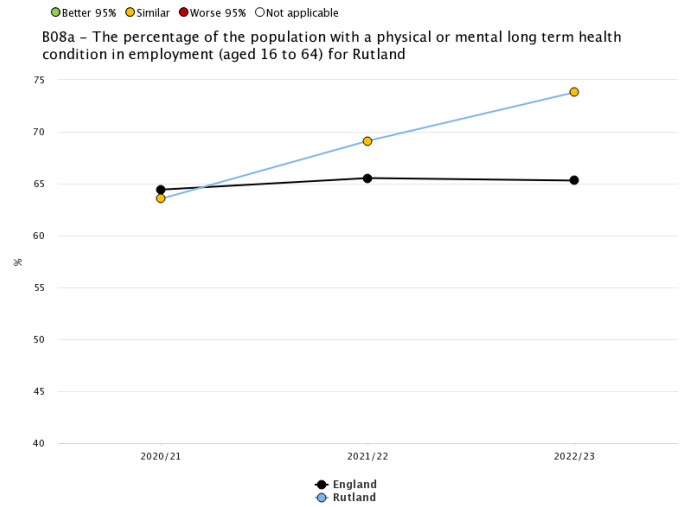

Gap in the employment rate between those with a physical or mental long term health condition (aged 16 to 64) and the overall employment rate

- The gap in the employment rate between those with a physical or mental long term health condition (aged 16 to 64) and the overall employment rate for Rutland has decreased from 6.8 percentage points in 2021/22 to 3.3 percentage points in 2022/23. This is statistically similar to the national gap of 10.4 percentage points.

Percentage of the population with a physical or mental long term health condition in employment, aged 16 to 64

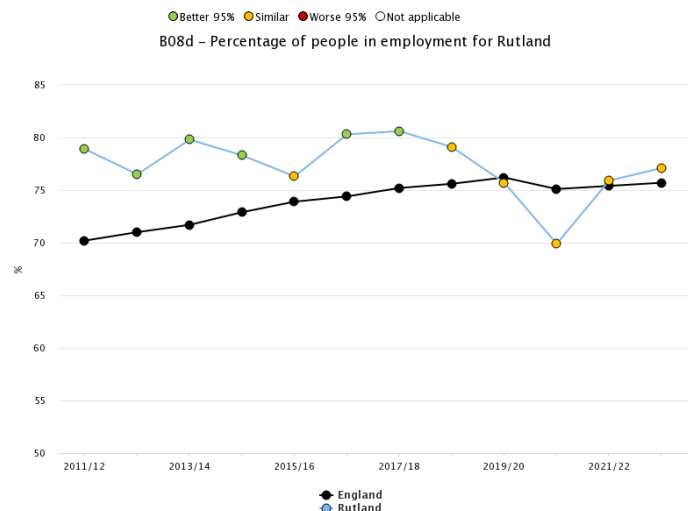

- The proportion of the population with a physical or mental long term health condition in employment (aged 16 to 64) has increased from 69.1% in 2021/22 to 73.8% in 2022/23. This is statistically similar to the England percentage of 65.3%.

3. The overall employment rate has increased over the past year in Rutland.

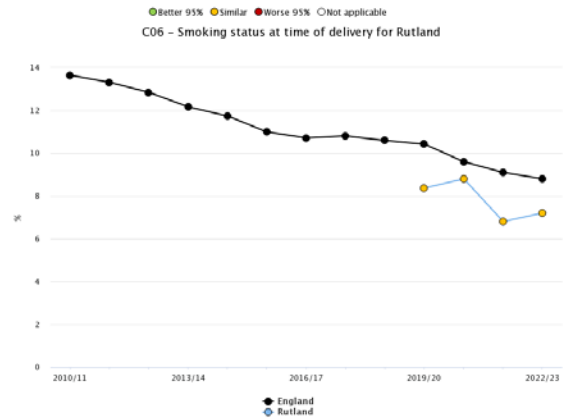

Percentage of the population in employment

- The proportion of the population in employment (aged 16 to 64) has increased from 75.9% in 2021/22 to 77.1% in 2022/23. This is statistically similar to the England percentage of 75.7%.
- The trend over the last 5 time periods shows no significant change.

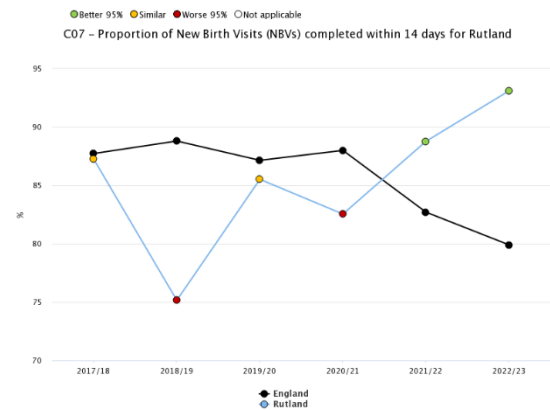

4. Smoking status at time of delivery continues to perform statistically similar to the England average.

- Smoking status of women at the time of delivery in Rutland has increased from 6.8% in 2021/22 to 7.2% in 2022/23. The percentage for Rutland is statistically similar to the England percentage of 8.8%.

5. The proportion of New Birth Visits (NBVs) completed within 14 days performs better than the England average.

- The proportion of NBVs completed within 14 days in Rutland has increased from 88.8% in 2021/22 to 93.1% in 2022/23. Rutland is performing significantly better than the England percentage of 79.9%.
- The recent trend over the last 5 time periods indicates that there is a significant improving (increasing) trend.

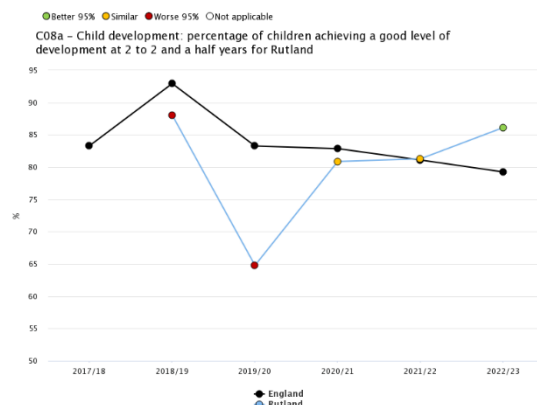

6. Child development indicators in Rutland have improved.

**There are concerns about the data quality of these three indicators, due to variability within and between areas in how the data was collected and administered. These statistics should be interpreted with extreme caution.*

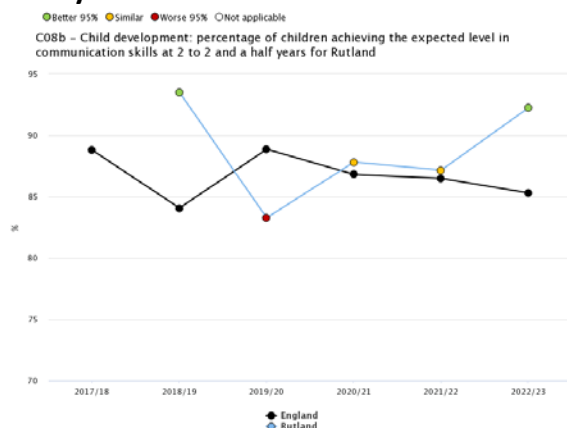

Children achieving a good level of development at 2 to 2 ½ years

- The percentage of children achieving a good level of development at 2 to 2 ½ years in Rutland has increased from 81.3% in 2021/22 to 86.1% in 2022/23. Rutland is now performing significantly better than the England percentage of 79.3%.
- This is the first year since 2017/18 that Rutland has performed significantly better than England.

- E15 – Estimated dementia diagnosis rate (aged 65 and over)

All Indicators – Rutland’s Performance is Getting Worse

From August 2016, markers of significant trend were added to the PHOF. When there are at least five consecutive non-overlapping data points available for a proportion or crude rate indicator, a chi-squared statistical test for trend is carried out on the most recent five points. If there is no significant trend in the most recent five points, the test is redone, including an additional (sixth) point, and so on, going further back until the full series has been tested.

- C24a – Cancer screening coverage – breast cancer
- D04e – Population vaccination coverage – HPV vaccination coverage for one dose (12-13 years old) (Female)
- D04g- Population vaccination coverage –Meningococcal ACWY conjugate vaccine (MenACWY) (14 to 15 years)
- D06b – Population vaccination coverage: PPV
