

Question from Melanie Mansell

I would like to submit a question for the Growth, Infrastructure and resources Scrutiny committee-Thursday13th August 2020 at 7.00pm. This relates to item 8 - Statement of Community Involvement. My question is as follows: _

“Given that one of the Gunning principles require that ‘conscientious consideration’ must be given to the consultation response, and that there have been some serious challenges to the legality and appropriateness of the consultation, are the scrutiny committee satisfied that the leading nature of question 3 has not unfairly influenced those people who took the time to respond?, and to what extent does this render the Consultation on the Statement of Community Involvement ineffective?”

I ask that this is debated at the scrutiny meeting and not side-lined with only a written response provided with the minutes.
