## School Capacity Survey 2020

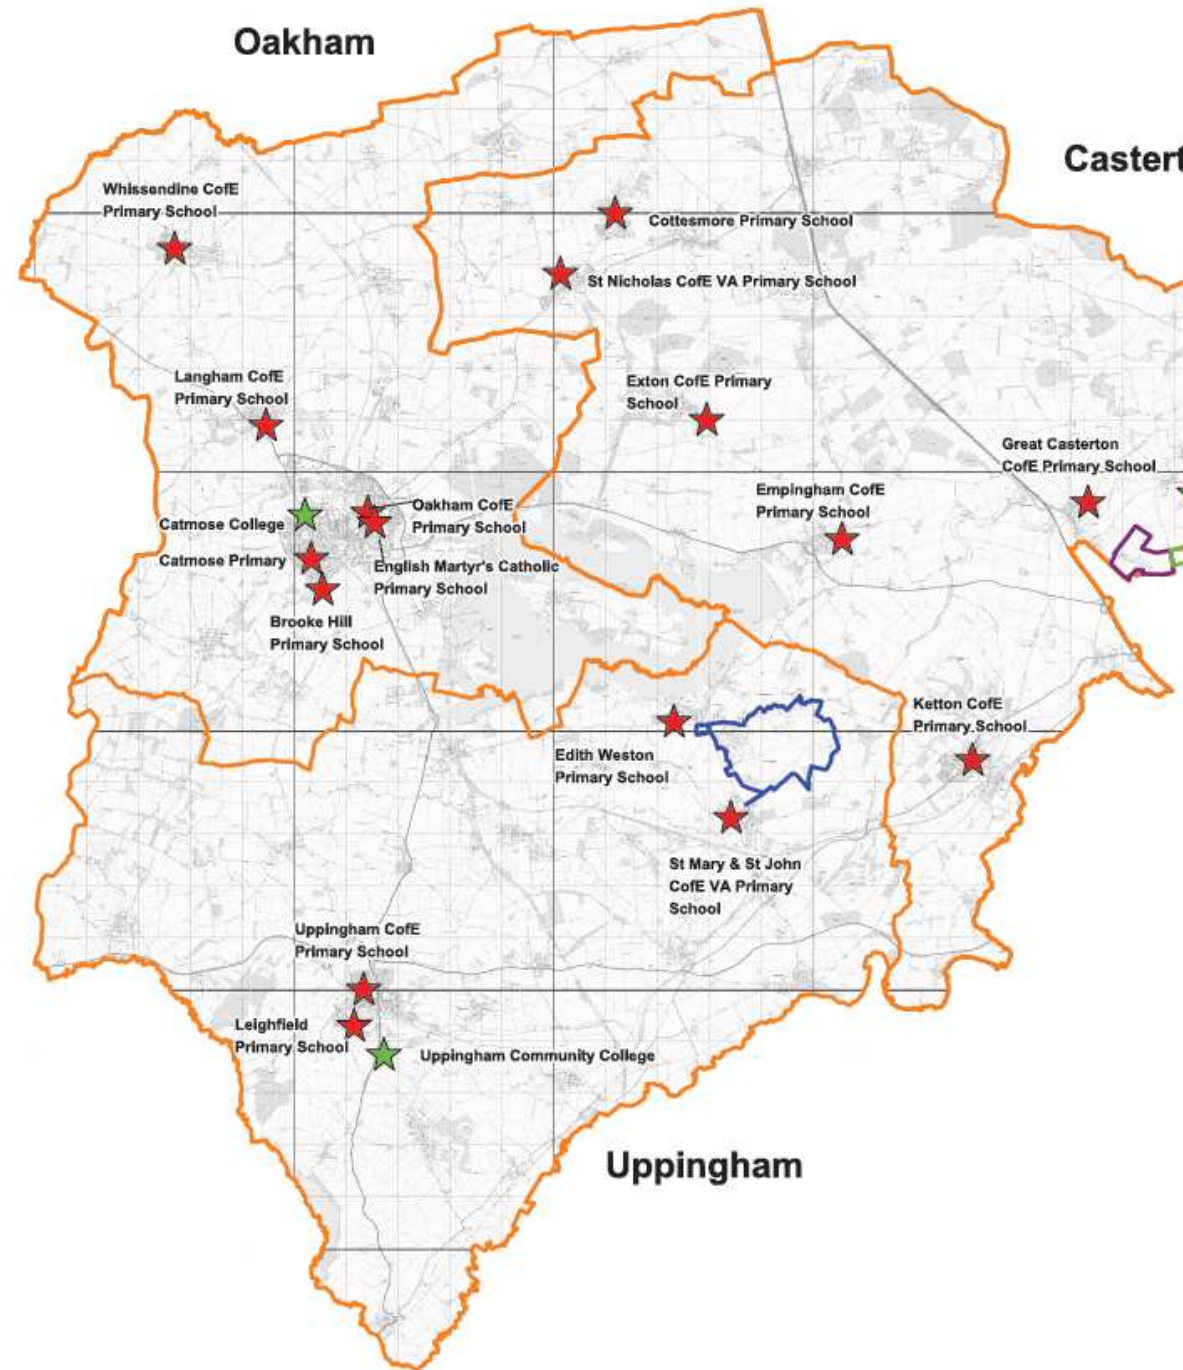

## About School capacity Survey (SCAP)

- The School Capacity Survey is an annual return submitted to the DfE by Local Authorities.
- Authorities are required to:
  - Confirm the capacity in their planning areas
  - Provide a pupil forecast for the following 5 years (7 years for Secondary)
  - Confirm plans to add/remove school places for the coming three academic years
- Data is collected by planning area. A planning area is a group of schools pre-agreed by the Local Authority and the DfE.
- The school capacity survey 2020 was cancelled due to COVID-19. The Local Authority continued its usual procedures for producing a forecast.

## About the Rutland survey return

- Rutland has one primary planning area and one secondary planning area.
- Internally we divide the county into three clusters. Each containing one secondary school and several primary schools. This allows to make better use of local knowledge.
- Data used to create forecast includes
  - Live Births from NHS
  - Numbers on Roll from School Census
  - Housing development schedule from planning team
  - Reported capacity from schools
  - Input from the MOD and neighboring local authorities

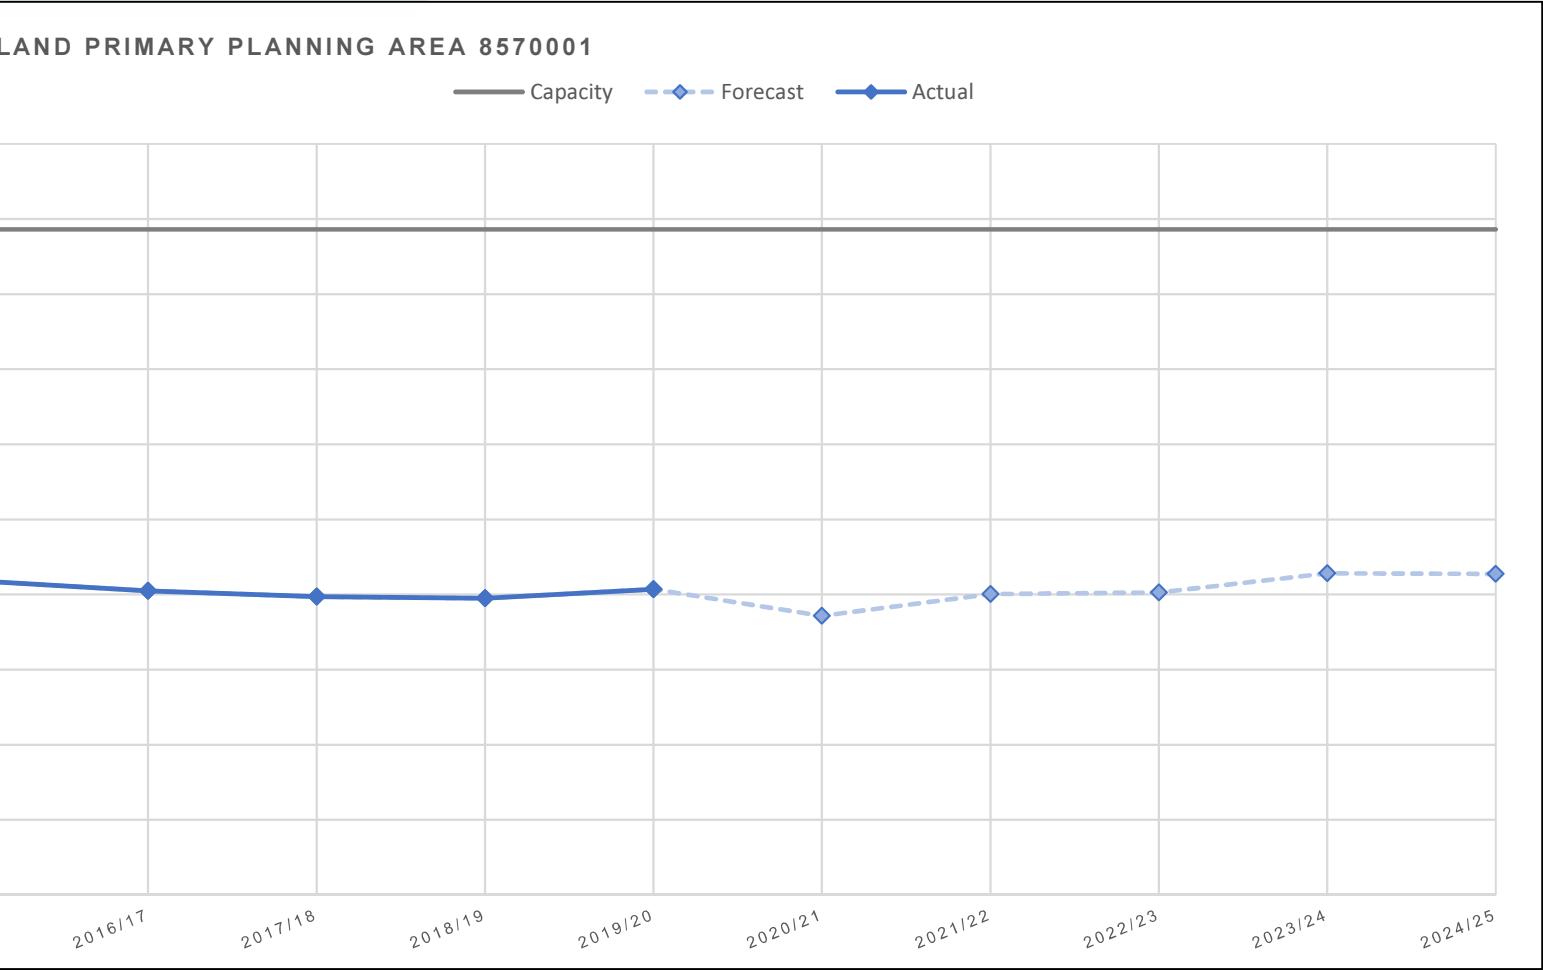

A large, light teal shape on the left side of the slide, consisting of a rectangle with a quarter-circle cutout at the bottom right corner.

# Primary School Forecast

A yellow shape at the bottom right of the slide, resembling a stylized hill or a wave.

# Rutland Primary Schools

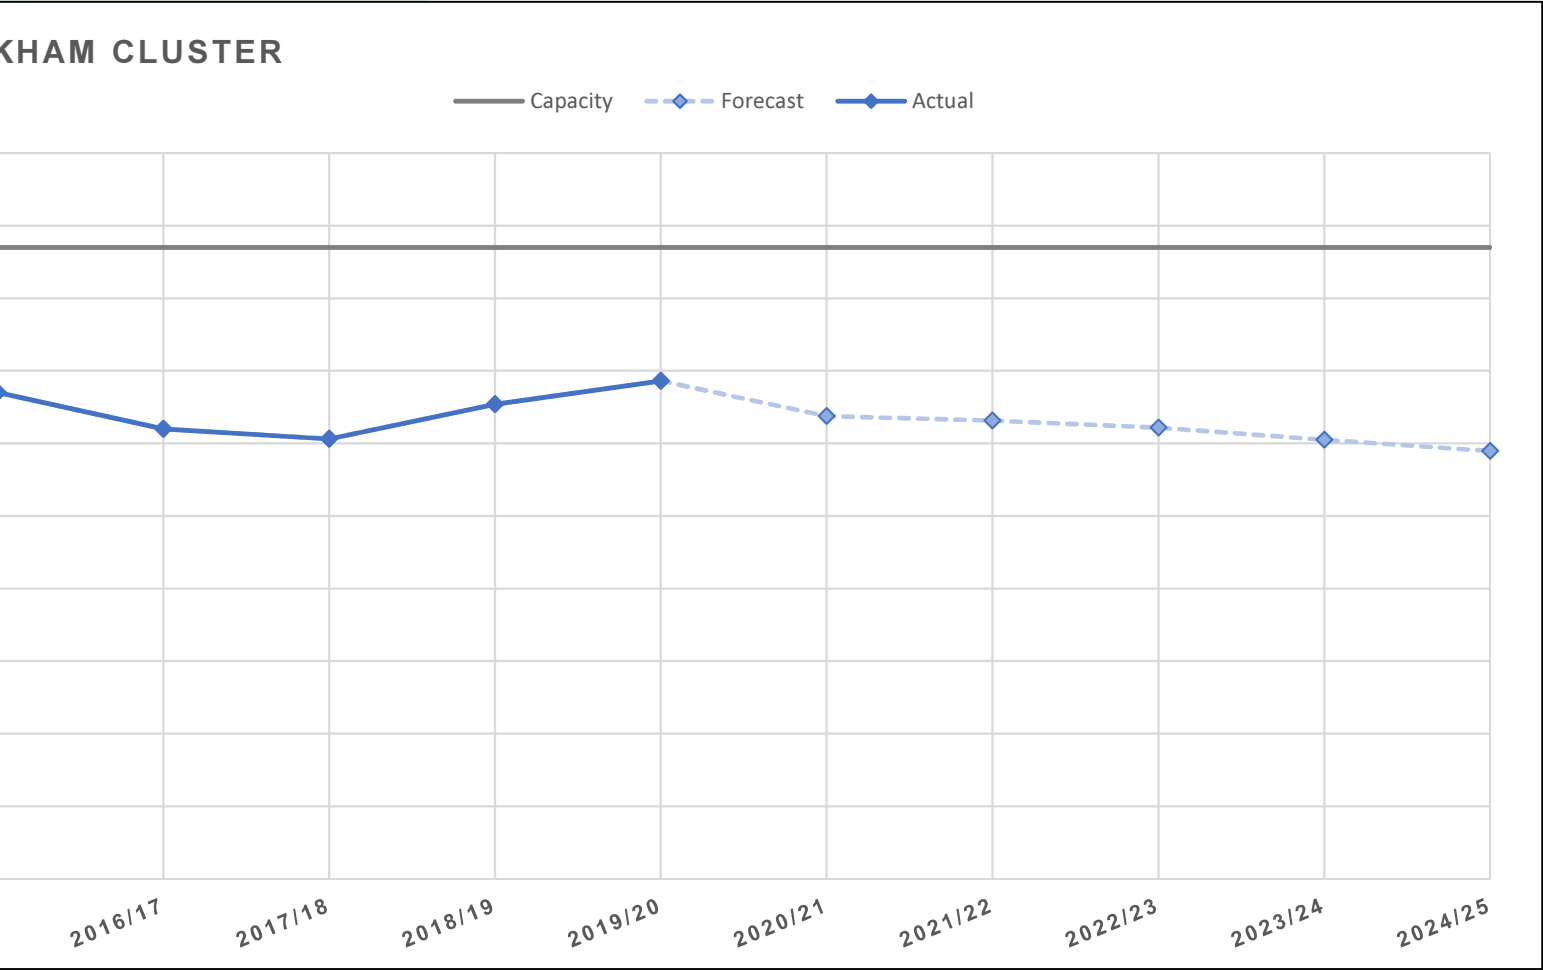

Year	Total	% Capacity
