Partnership Commissioning

Local authorities and clinical commissioning groups (CCGs) must make joint commissioning arrangements for education, health and care provision for children and young people with SEN or disabilities (Section 26 of the Act).

Joint commissioning should be informed by a clear assessment of local needs. Health and Wellbeing Boards are required to develop Joint Strategic Needs Assessments and Joint Health and Wellbeing Strategies, to support prevention, identification, assessment and early intervention and a joined-up approach

Joint Collaborative Commissioning Strategy

- **Establishment of Joint Commissioning Strategy and Transformation Group**

The purpose of the Joint Strategic Planning and Transformation Group is for the CCG, Childrens and Family Services and Public Health to work together at a System level:

- To align commissioning priorities and explore joint commissioning opportunities
- To identify opportunities for collaboration and transformation in service design and delivery
- To advice on Commissioning Proposals developed within other working groups in the STP meetings structure

- Development of a collaborative Vision for SEND across LLR:

“we will work together across Leicester, Leicestershire and Rutland to improve the outcomes for children and young people with SEND”

Priority focus on development of an LLR SEND Joint Commissioning Strategy and alignment of local SEND strategies Leicester City, County and Rutland. Consultation December 20- January 21
