Contract Title	Grounds Maintenance ar	nd Forestry Services	
<b>Contract Description</b>	Undertaking of grounds r	maintenance in relation to c	ouncil assets to include,
	grass cutting, shrub main	tenance, hedge maintenand	ce, closed cemetery
	maintenance, weed man	agement, tree maintenance	and associated works
		1	
Contract Dates	Start: 01/04/2023	End: 31/03/2027	Extension option 2 x 12
			Months
Proposal to:	Conduct a Further Compo	etition – under YPO: <b>DPS 88</b>	1 Grounds Maintenance
	and Associated Services		
Responsible Officer	Ben Thompson		

#### **Background/Overview**

The Council currently has a shared service agreement with Harborough District Council for the provision of Grounds Maintenance service through FCC Environment, for a 3 year Term (from 1<sup>st</sup> March 2019 until 31<sup>st</sup> March 2022), with two x 12 month extension options.

The Council has secured a 12-month extension to its Grounds Maintenance Services contract until 31 March 2023, with new contracts due to commence on 1 April of the same year.

The Council has a Forestry Contract with George Walker (Tree Care) Ltd, the outcome of a competitive tendering process that was undertaken during 2017, for a 5 year Term (from 1<sup>st</sup> February 2018 until 31<sup>st</sup> January 2023), with five x 12 month extension options. The Forestry contract is currently set to expire on 31<sup>st</sup> of January 2023, the Council will therefore extend the contract by x2 months to 31<sup>st</sup> March 2023 to enable the end date to align with the end of the current Grounds Maintenance contract.

#### The intention is to:

- Undertake pre-procurement exercise/planning. This will include a review of the service in readiness for commencing a re-procurement exercise for these Environmental Services contracts during 2022.
- Following completion of relevant due diligence as part of the pre-procurement exercise, we shall commence the re-procurement exercise of a consolidated Grounds Maintenance & Forestry Services contract. Previously the Forestry service has been conducted under its own contract, due to the similarities in grounds maintenance and forestry work and the two contracts ending on the 31<sup>st</sup> March 2023 it has become evident that there is merit in combining the two services into one contract. Although the specialist Tree surgery works shall need to be kept as a separate Contract arrangement, to be procured separately, as the skills set and contract requirements for this specialist work is different to that required for the consolidated Grounds Maintenance & Forestry Services contracts.

For new and renewal contract/framework agreement the information fields detailed below must be completed.

#### **Contract Details & Procurement Plan**

...

<u>Headings</u>	
Scope of requirement	<ul> <li>To provide a comprehensive and robust suite of supporting tender documents to enable future bidders for the Grounds Maintenance &amp; Forestry Services contracts to provide value for money bids.</li> <li>To realise any service efficiencies from undertaking relevant due diligence prior to retendering the service, through lessons learnt exercise and clear service mapping.</li> <li>To re-procure the service contracts in a resource efficient manner, using the services of Welland Procurement to adopt the most suitable procurement route for the Council to take.</li> <li>Minimising the extent of Bidder's risk-pricing the contracts by producing high quality specification outputs, clearly defined pricing schedules and robust supporting tender and contract documentation.</li> <li>Ensuring the service requirements are packaged/offered to the market, to maximise efficiencies for Service provision.</li> <li>To deliver the project in a timely, planned, and co-ordinated approach to ensure the new contracts can be awarded and mobilised (and the incumbent contractors demobilised) within the timescales specified prior to 31<sup>st</sup> March 2023.</li> <li>Aspire to deliver a saving on the current annual contact costs, this will be achieved by the repackaging of tree work as described above and in the design of specifications.</li> <li>To attribute to and align with the council's biodiversity objectives, set out in Appendix 1 of this Business Case.</li> </ul>
Contract Objectives	To procure a Grounds Maintenance contractor that will provide the services of Highway, Urban and Public Open Space, grass cutting, Shrub pruning and reductions, low level crown lifts and epicormic growth removal, tree, and shrub planting. Including all associated ground works for the above items.  To procure a Forestry contractor that will provide the service of tree reductions, tree felling and all specialist forestry aspects.

	Budget for Grounds Maintenance is currently £450,000 p.a.
	Forestry current budget is £115,000 p.a.
	Total estimated spend £3,390 million over the full Contract term. This equates c. ££2.26m over the initial 4-year contract term and £1,130,000 for 2x12 months extension option)
	Check and confirm current budget
Financial Proposal	The Project Risk Evaluation Tool has been applied which has categorised this is as a medium-risk project. The project will be managed in line with financial requirements as set out in the councils financial due diligence guidance for managing a medium risk projects – for the purposes of setting the relevant financial vetting standards as part an Open procurement process (note this will not be relevant if Call-off via either a Framework or DPS); and for setting a relevant and proportionate contract management approach during the life of the new Contract.
Customer base	The Contract will service the council's own requirements principally in relation to Environment, Property, Highways and Property assets. The contract manager will be a nominated Officer from the Environmental Services Team (client side).  The Annual contract usage will be defined within the asset information to be provided as part of the tender documentation. Whilst the contract is in use there will be an ability to increase and/or decrease areas through a notice of change in alignment with the associated bill of quantities.
Customer & Stakeholder Engagement	Lessons Learnt exercise with Incumbent - A questionnaire has been submitted to the current contractor that will identify any areas that have been problematic through the current contract as part of a lessons "learnt process".  Internal customers within the directorate (Environment, Property, Highways and Property) have been alerted to the proposed change of contract/contractor. Further discussion will take place with internal clients as the detailed specification is developed.
Social Value Consultation	We will ensure that the new service specifications align with biodiversity considerations through consultation with the Members Climate Action Group and in turn through their association with a volunteer network. This group is a strong link with members of the community where they are able to voice suggestions of how to improve the local areas' biodiversity.
Equality Impact Assessment	No EIA is required.

This approach is not being proposed.	Market Sector and Suppliers	A soft market testing exercise will be considered – as part of determining a procurement and lotting strategy in support of this project. It is believed that large national organisations, local providers and small & medium sized enterprises will all show interest in this new contract opportunity. The market place is mature, but there will potentially be issues given the relatively low contract value and geographical location of Rutland, hence our intention to undertake soft market testing exercise.		
Develop Outline Business Case	Joint/Collaborat	This approach is not being proposed.

	GDPR Screening Questions
	a) Will the project involve the collection of new information about individuals?
	No
	b) Will the project compel individuals to provide information about themselves?
	No
	c) Will information about individuals be disclosed to organisations or people who have not
	previously had routine access to the information?
	No
<b>Data Protection</b>	d) Are you using information about individuals for a purpose it is not currently used for, or
Impact	in a way it is not currently used? <b>No</b>
Assessment	e) Does the project involve you using new technology that might be perceived as being
	privacy intrusive? For example, the use of biometrics or facial recognition. <b>No</b>
	f) Will the project result in you making decisions or taking action against individuals in ways
	that can have a significant impact on them? <b>No</b>
	g) Is the information about individuals of a kind particularly likely to raise privacy concerns
	or expectations?
	No
	h) Will the project require you to contact individuals in ways that they may find intrusive?
	No

# Exit

Strategy/Plan

The detailed exit/mobilisation strategy/plan will be formulated as draft documentation is prepared.

All planned service provision under the existing Grounds Maintenance contract will have been concluded by 31st December 2022, with the existing contractor (Harborough District Council) only being asked to undertake emergency/essential work, if any, prior to the existing contract ending. Upon contract award the plan/strategy for transferring for exit/mobilisation will be finalised and agreed. This is likely to include:

- Confirmation with existing contractor that all work in progress, if any, is scheduled for completion in a timely fashion and payment.
- Confirmation of future work programmes and timescales with new contractor
- Familiarisation with contract assets
- Arrangements for depot handover
- Reporting and monitoring/management arrangements and financials set up
- Any related HR/TUPE issues
